16 December 1969

MEMORANDUM FOR: Executive Officer, Technical Services & Support Group

SUBJECT : Nominations for Career Education Awards Program and Educational Program in Systems Analysis for 1970-71

1. RED has reviewed, at your request, nominations for the Career Education Awards Program and Educational Program in the Systems Analysis for 1970-71. We regret that we do not have a candidate at this time. Four people were given consideration for the Career Education Awards Program: [redacted]

2. [redacted] was eliminated because he is under a different career service, being assigned to us from OMS.

3. [redacted] is currently considering a year of duty in PPBS at [redacted] request, and it would appear imprudent to recommend him at this time.

4. [redacted] has just recently returned from extensive career training in excess of six months, and is just taking over the Imagery Interpretation Research work again. Another long absence at this point would be unwise.

5. [redacted] would be the only practical person, but I do not feel that he meets all of the necessary criteria; primarily, that portion which states "Nominations are restricted to career officials being prepared for more complex and difficult administrative line and staff positions. John has not reached this status yet; although, I'm confident that he will. I think he would be an excellent candidate for future openings when he reaches GS-12 or GS-13 status. He has plenty of time since he just barely meets the age requirements, having just turned 28.

6. The Education Program in Systems Analysis is interesting but not currently applicable to our operations.

[redacted]
Deputy Chief,
Research & Engineering Division
